CLINICAL FACIALS

CASBAH IS PLEASED TO INTRODUCE

Dermasound is a clinically proven aesthetic technology that uses low level particle-free ultrasonic dermabrasion to loosen and remove dead cells and debris from the skin's surface. In addition to a thorough deep cleansing of the pores and destroying all bacteria on contact, the dermasound has a potent anti-inflammatory effect on the skin. It effectively treats acne, rosacea and delivers powerful anti-aging treatments.

The dermasound has three phases: Intense exfoliation of the epidermis by 20-50%, customized penetration of high grade antioxidants and finally, ultra hydrating ultrasonic massage to regulate skin cell function.

Did you know that your hands show the first signs of aging? Treat pigmentation, liver spots and discoloration with this advanced IPL treatment. Restores the youthful appearance of your hands!

CLINICAL PEELS

Clinical Peeling is a safe, proven method of advanced skin rejuvenation. Casbah utilizes professional strength alpha hydroxy acid concentrations at safe ph levels and the best ingredient blends to give you superior, rapid results. The use of a certified sunscreen is mandatory for these treatments and sun exposure is not recommended when using alphahydroxy acids.

GLYCOLIC PEEL PREPARATION TREATMENT (45 MIN) **\$69**

This treatment is a must before starting any peeling program. It begins with a personalized consultation to assess the needs and goals of your skin and consists of a thorough cleanse, an in-depth skin analysis, deep exfoliation and mini peel.

INTENSIVE GLYCOLIC PEEL TREATMENT (45 MIN) **\$99**

Skin revitalization at its best! Renew and refresh tired, sluggish skin. This treatment will boost cell turnover, collagen and elastin production and immediately improve the tone, texture and hydration of your skin. An ideal treatment companion to IPL Photorejuvenation treatments.

INTENSIVE LACTIC PEEL TREATMENT (45 MIN) **\$99**

Treat skin pigmentation and discoloration with the safest Alpha Hydroxy Acid products available. We take a clinically proven blend of Lactic acid and anti-oxidant support to even skin discolorations, undo sun damage and soften skin texture. Unique, all natural skin tone balancing ingredients produce immediate improvement in the skin with little or no downtime. The perfect compliment to IPL Photorejuvenation treatments.

BODY PEELS

Why just focus from your shoulders up? You can renew your entire body using clinically proven skin renewing Alpha Hydroxy Acids. Treat Pigmentation, acne lesions, rough skin, uneven tone and texture on the back, legs, stomach and arms. An excellent compliment to our Cellulite XT treatment.

LASER HAIR REMOVAL

Hair bearing areas are treated with a focused beam of concentrated laser light which is selectively absorbed by the melanin in the hair shaft, as well as in the surrounding hair follicles. This causes thermal destruction of these anatomical sites and disrupts the hair follicles' ability to regenerate. In turn, this procedure causes permanent hair reduction.
